---	---	---

Name : Phatcharee Thongkum

Company : Solvay Peroxythai Limited

Current Position : HSE Manager

Working Experience : 15 years

Presentation Topic : Emergency Plan and Response

Presentation Abstract:

Emergency Plan and Response is a part of Emergency Management. The Emergency Plan shall define and document the definitions, Roles and Responsibilities and possibility scenarios.

The scenarios could be from hazard identification, Risk assessment, Process Hazard Analysis or minimum requirement of regulation such as PSM (Process Safety Management), Emergency Response Plan defined by Authorities.

Emergency Plan and Response at a minimum includes: Preparedness, Response, Recovery, Prevention and Mitigation.

Training, Test and Drill including Notification and Report are a sub-action of Emergency Management but all of the things above are important and interested.
