

TNCHE Asia 2023 Conference
Energy COP
Presenter Bio data & Abstract

Name : Srihari Kannan

Company : Shell Catalysts and Technologies

Current Position : Senior Licensing Technology Manager

Working Experience : 24 years

Presentation Topic : Affordable CCS- Shell CANSOLV CO₂ Capture Process

Presentation Abstract [1-3 Lines] :

The world needs more and cleaner energy. Most scenarios exploring how society can reach goals of the Paris Agreement (e.g. IEA, IPCC and Shell scenarios) include use of Carbon Capture and Storage (CCS). A huge increase in CCS capacity is needed. Building upon decades of innovation, experience, and knowhow on the use of amine systems for CO₂ capture from a variety of gases, Shell Catalysts & Technologies offers the CANSOLV® CO₂ process - a proven and mature post combustion CO₂ capture process.
