

TNCHE Asia 2024 Conference
" Decarbonization, AI and Digital Transformation
for Sustainability in Process Industries "
Presenter's Biodata & Abstract

Full Name : Pornravee Leelachaikul
Company/ Organization : Yokogawa (Thailand) Ltd.
Current Position : Technical Support Consultant
Title of Presentation : Bringing Decarbonization to Life™: Solutions for Greenhouse Gas Emissions Management

Presentation Abstract :

Emissions management systems are becoming essential tools for monitoring, controlling, and reporting all greenhouse gas emissions. Consequently, the process industry must prepare to enhance the integrity, discipline, and credibility of emissions data systems while meeting minimum system requirements for operation.

I would like to introduce The Visual MESA® Greenhouse Gas Emissions Management (VM-GEM) solution, which integrates energy management and production accounting expertise to offer a unique approach to managing emissions. It provides reliable monitoring, effective optimization, and accurate accounting of greenhouse gas (GHG) emissions.
