containment

Safety

No
undetected
leaks

No manual
valves in
wrong
position

No non-
uniform
temperature
profiles

Production

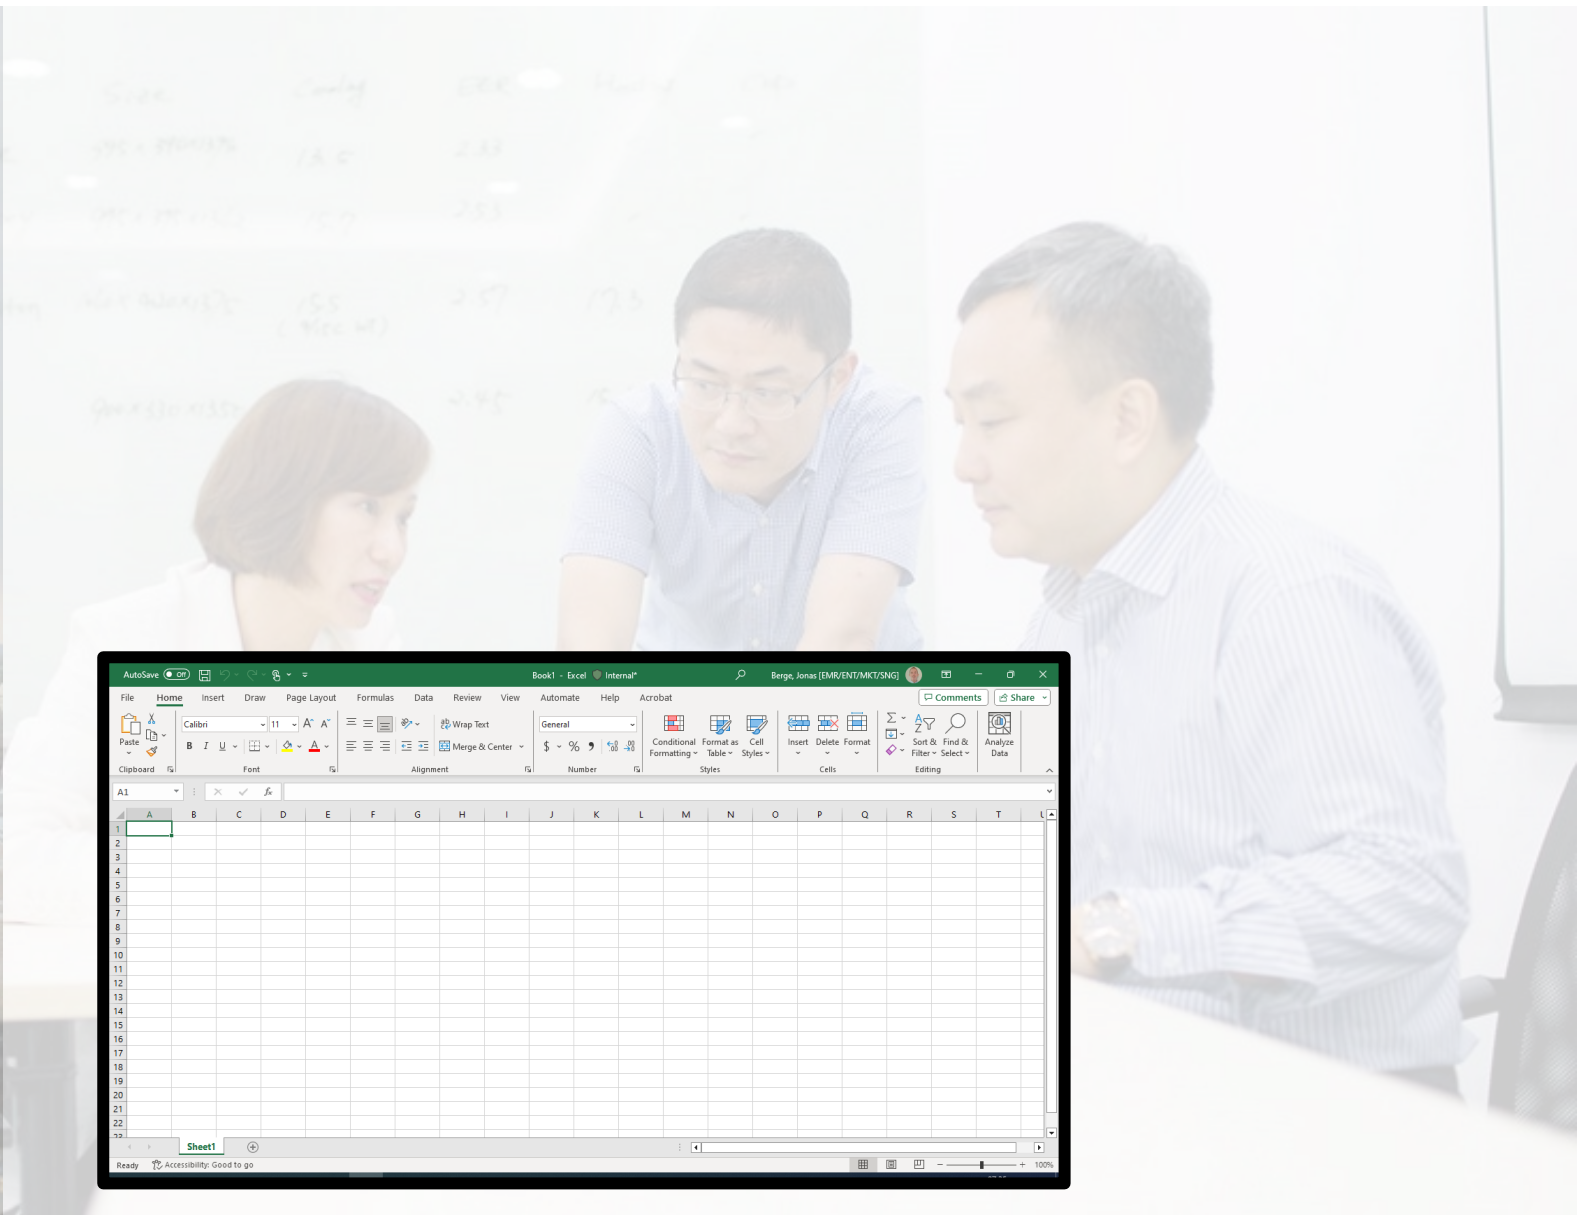

Reliability

Familiar Plant Challenges in Every Operational Area – Manual Work

MANUAL DATA COLLECTION

MANUAL DATA INTERPRETATION

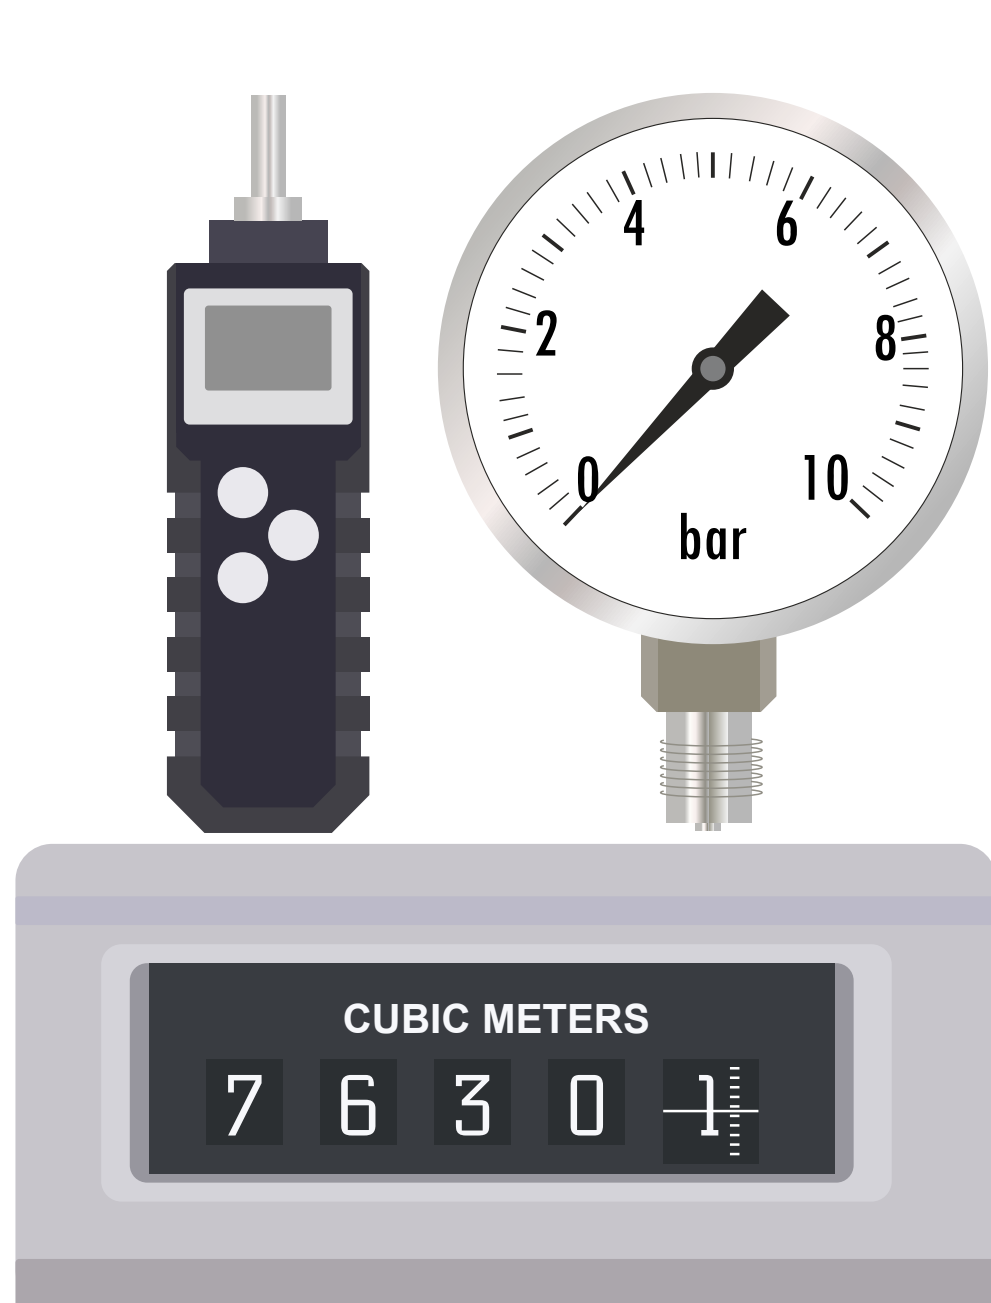

The Power of Zero

Safety	Sustainability	Reliability	Production
Situationally aware	Responsive	Predictive	Productive
“Zero incidents”	“Zero emissions”	“Zero downtime”	“Zero off-spec”
Threat monitoring	Performance monitoring	Condition monitoring	Balance process monitoring

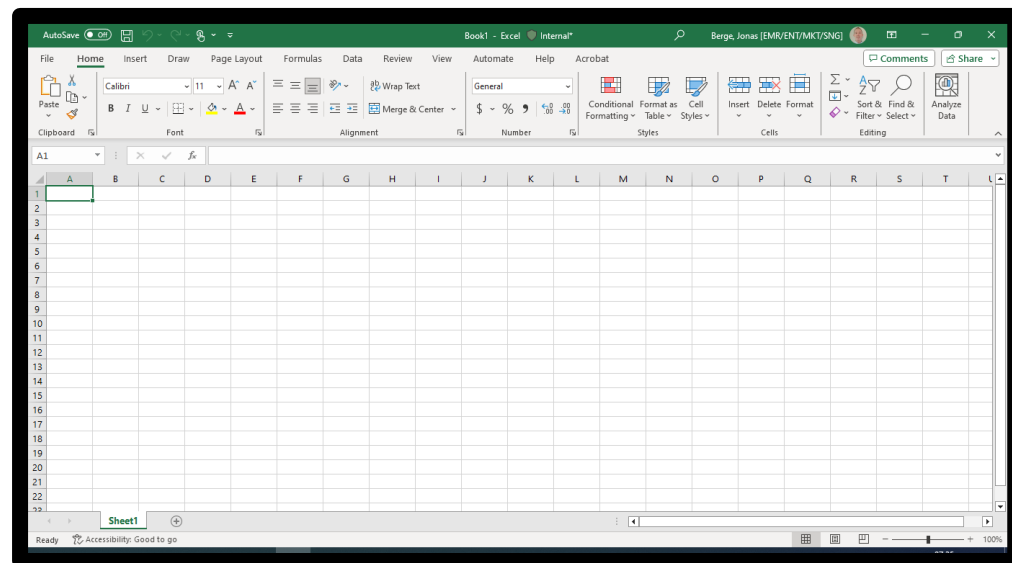

Transformation Starts with Automatic Data Collection

– Sensors Everywhere

- ✓ Corrosion
- ✓ Erosion
- ✓ Vibration
- ✓ Position
- ✓ Level
- ✓ Discrete
- ✓ Flow
- ✓ Pressure
- ✓ Temperature
- ✓ Acoustic noise
- ✓ Gas concentration
- ✓ Differential pressure
- ✓ Multi-temperature
- ✓ Motion
- ✓ Illuminance

Next: Data Interpretation with Specialized Analytics

Easy Modular App Examples

- ✓ Steam traps
- ✓ Pumps
- ✓ Heat exchangers
- ✓ Air-cooled heat exchangers
- ✓ Pressure relief valves
- ✓ Cooling towers
- ✓ Corrosion/Erosion
- ✓ Safety showers
- ✓ Inspection
- ✓ Industrial lighting
- ✓ Control valves

...

Example Occupational Health, Safety, and Environment Use-Cases with Readymade Solutions

Emergency safety shower activated

Manual valves in wrong position

Flammable gas leak

Toxic gas leak

Tank overfill

Breather valve and blanketing

Pipe corrosion and erosion

People out of harm's way

Example Sustainability Use-Cases with Readymade Solutions

Steam trap leak or blockage

Pressure relief valve release and passing

Air-cooled heat exchanger fouling

Cooling tower fouling

Heat exchanger fouling

Other over-consumption and loss

Methane leaks

Lighting power consumption

Example Maintenance, Reliability, and Integrity Use-Cases with Readymade Solutions

Pump failure

Air-cooled heat exchanger fan failure

Cooling tower gearbox failure

Pipe corrosion and erosion

Inspection rounds:
autonomous

Control valve
underperformance

Heat trace failure

Breather Valve Failure

Example Production and Quality Use-Cases with Readymade Solutions

Field operator rounds:
autonomous

Offsite tank farm
storage tanks

Wellhead and control
panel

Temperature profile

Local control panels

Offsite standby pumps

Consumables inventory

Manual valves

'Digital' Transformation

Monitoring & Optimization (M+O) Applications

- Transform manual tasks
 - Safety (occupational)
 - Sustainability
 - Reliability
 - Production (quality etc.)
- Freely make additions and changes

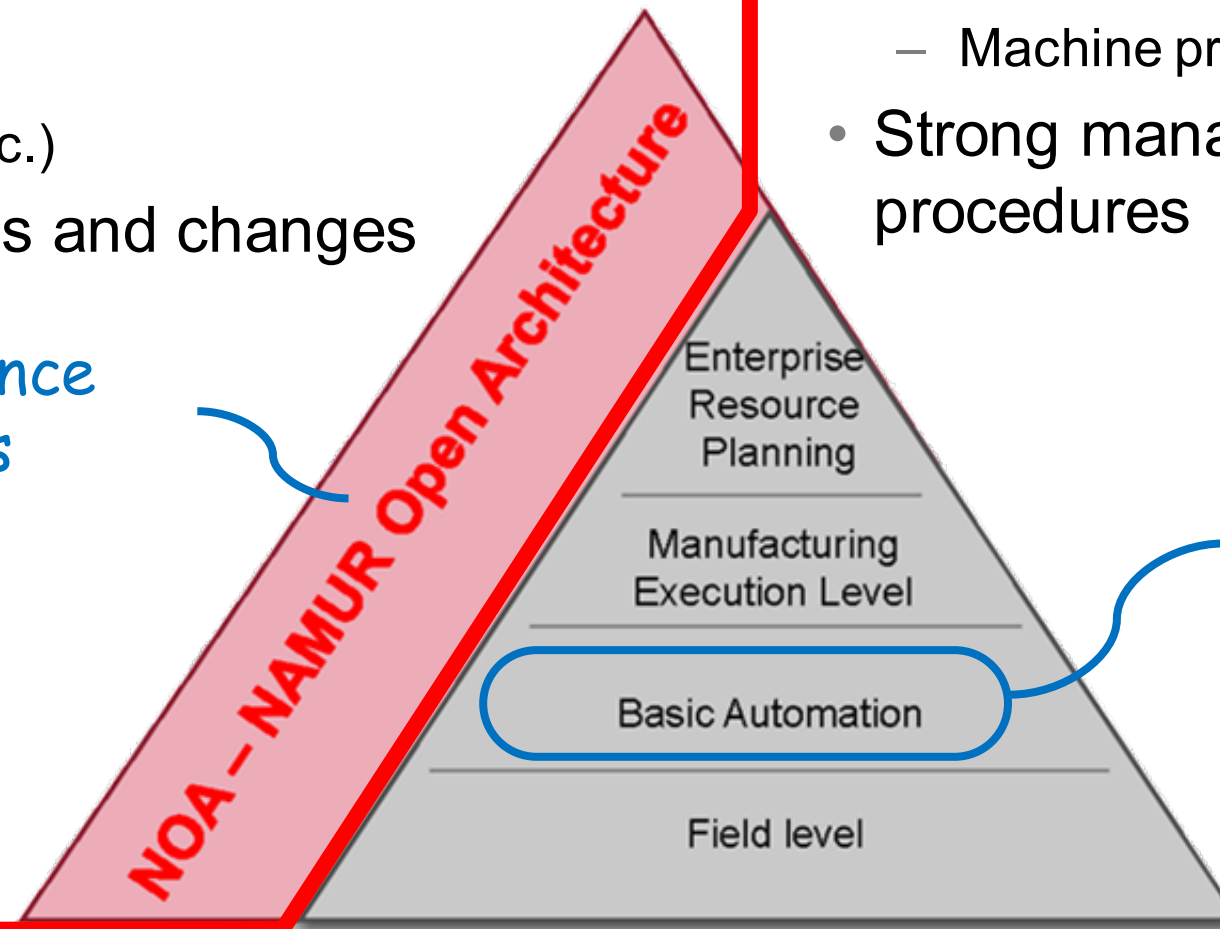

New Asset Performance
Management systems

Core Process Control (CPC) Applications

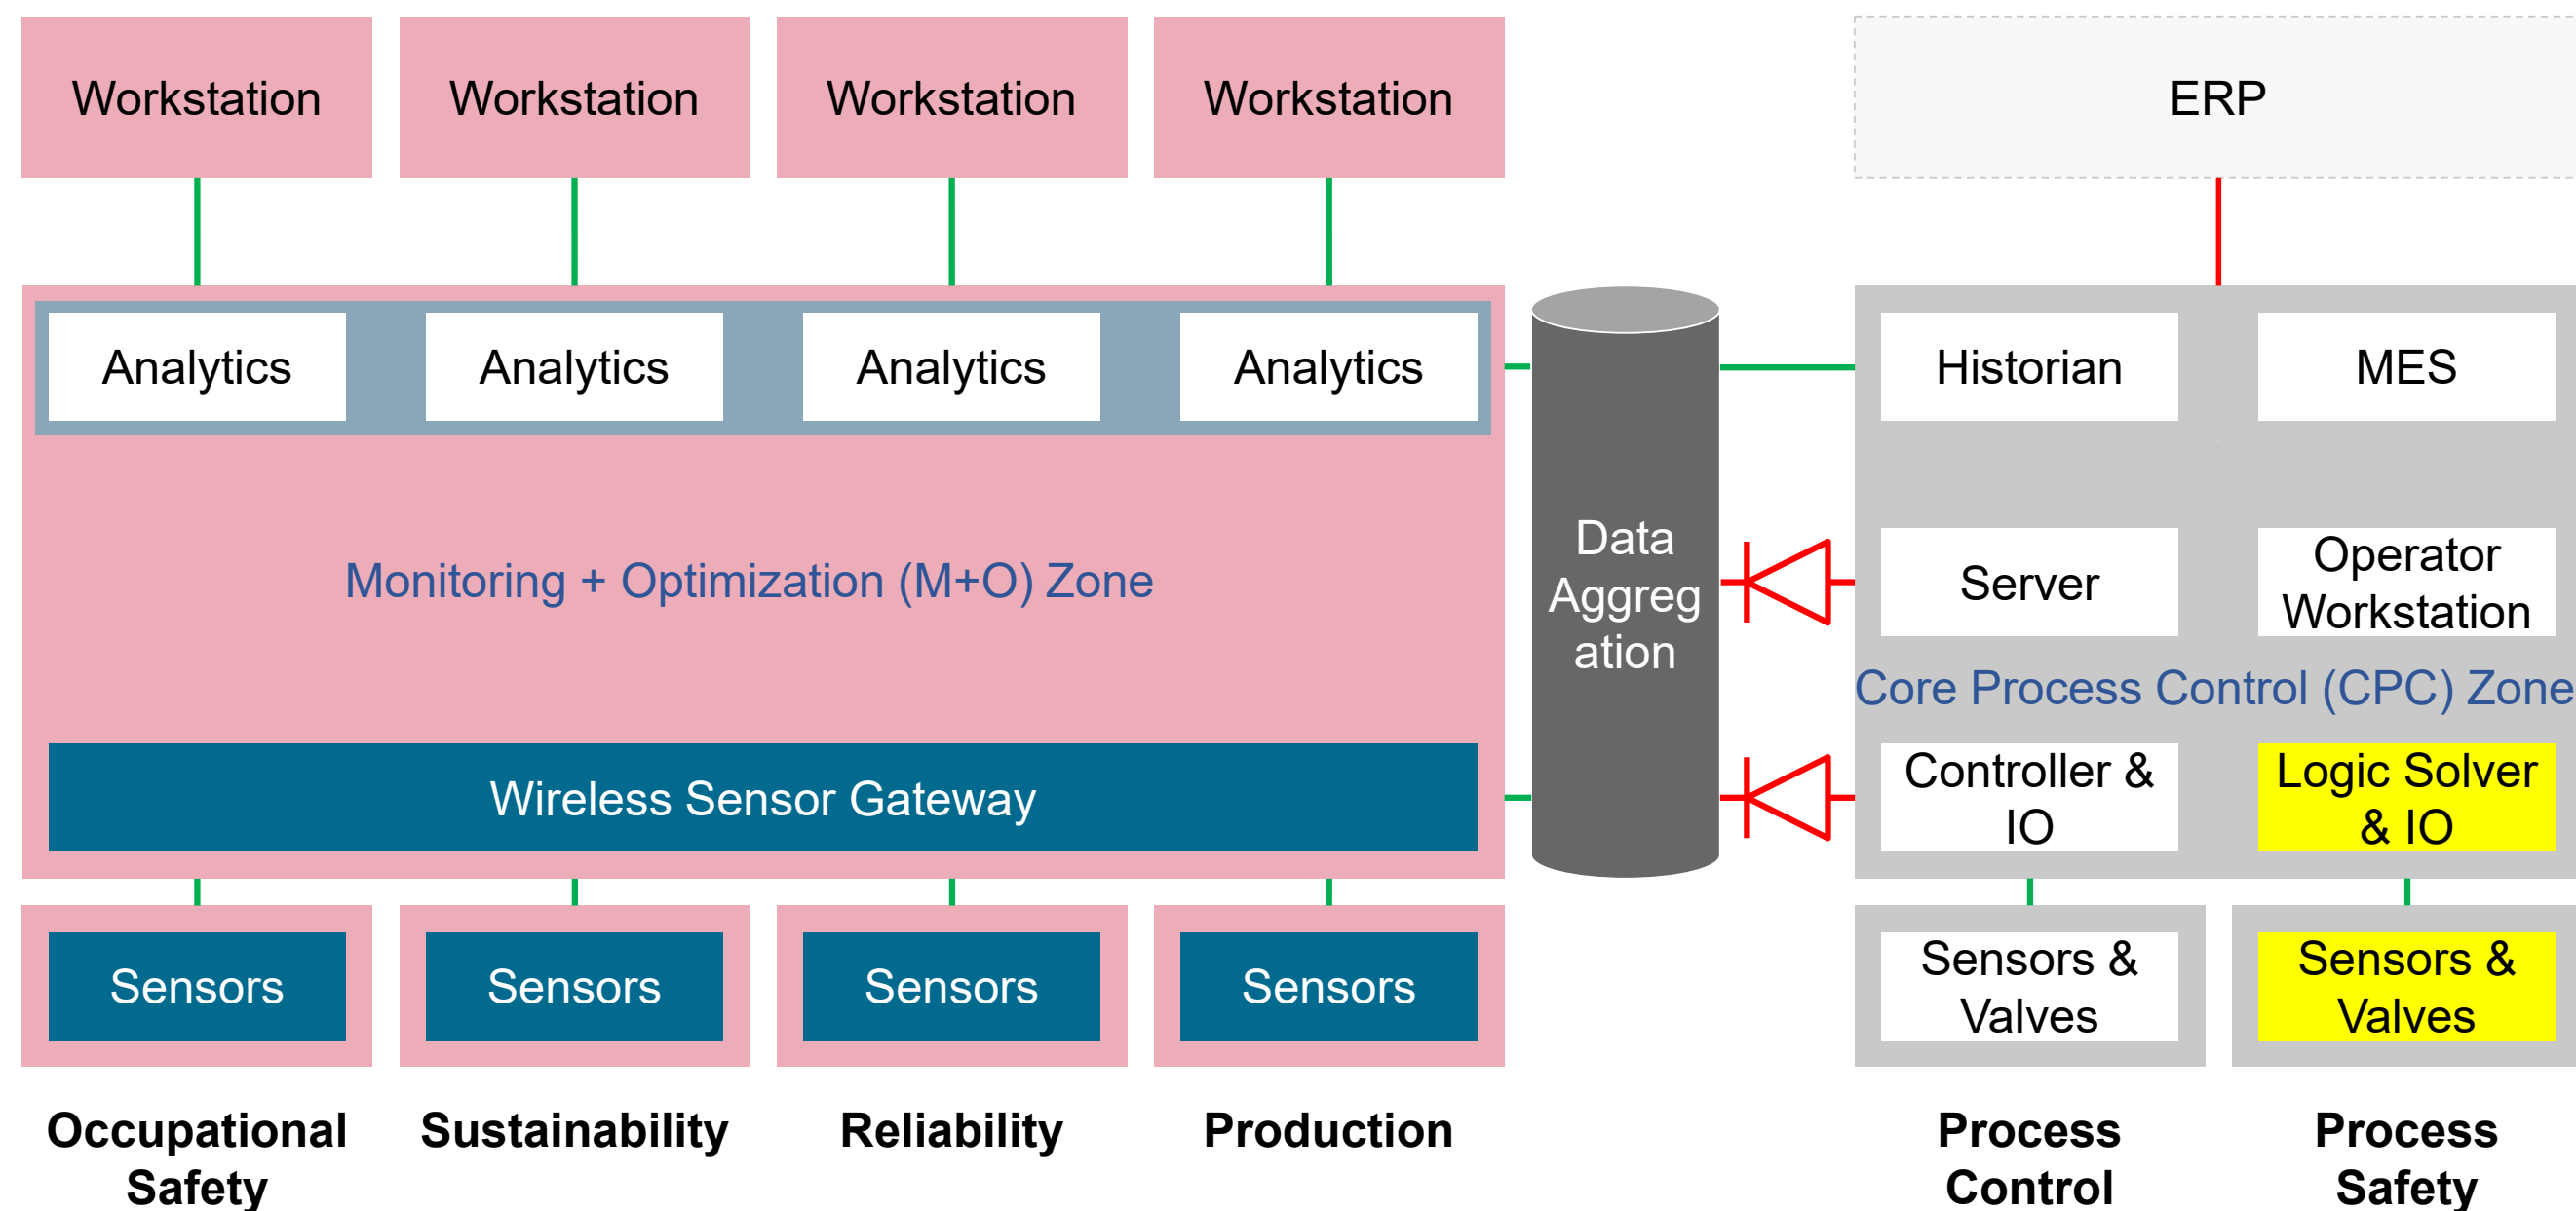

- Improve existing automation functions
 - Process control
 - Process safety
 - Machine protection
- Strong management of change (MoC) procedures

Integrated control and
safety system (ICSS)

- Distributed Control System (DCS)
- Safety Instrumented System (SIS)
- Machinery protection system (MPS)

The Unifying Architecture Delivering the Vision

Readymade Apps – Rapid, Capable, and Low Cost

- No coding, no testing, no development cost, no delay, no pilot PoC
- Proven track record
- Rich feature set

- Predict failures
- Pinpoint inefficiencies

Easy Modular App Examples

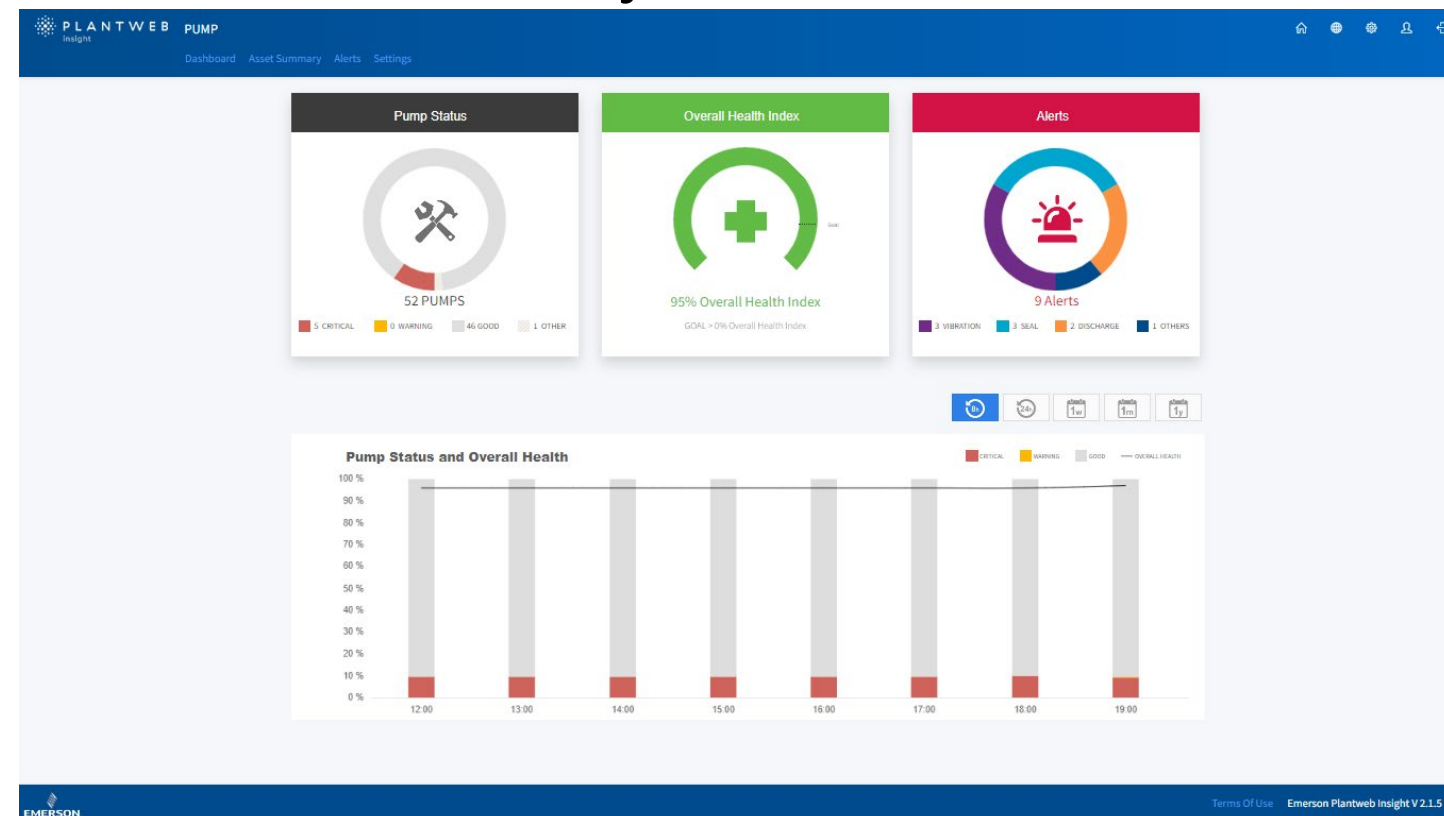

- ✓ Steam traps
- ✓ Pumps
- ✓ Heat exchangers
- ✓ Air-cooled heat exchangers
- ✓ Pressure relief valves
- ✓ Cooling towers
- ✓ Corrosion/Erosion
- ✓ Corrosivity
- ✓ Safety showers
- ✓ Inspection
- ✓ Industrial lighting
- ✓ Control valves

...

Analytics Without Data Science – Easy; Critical to Broad Adoption

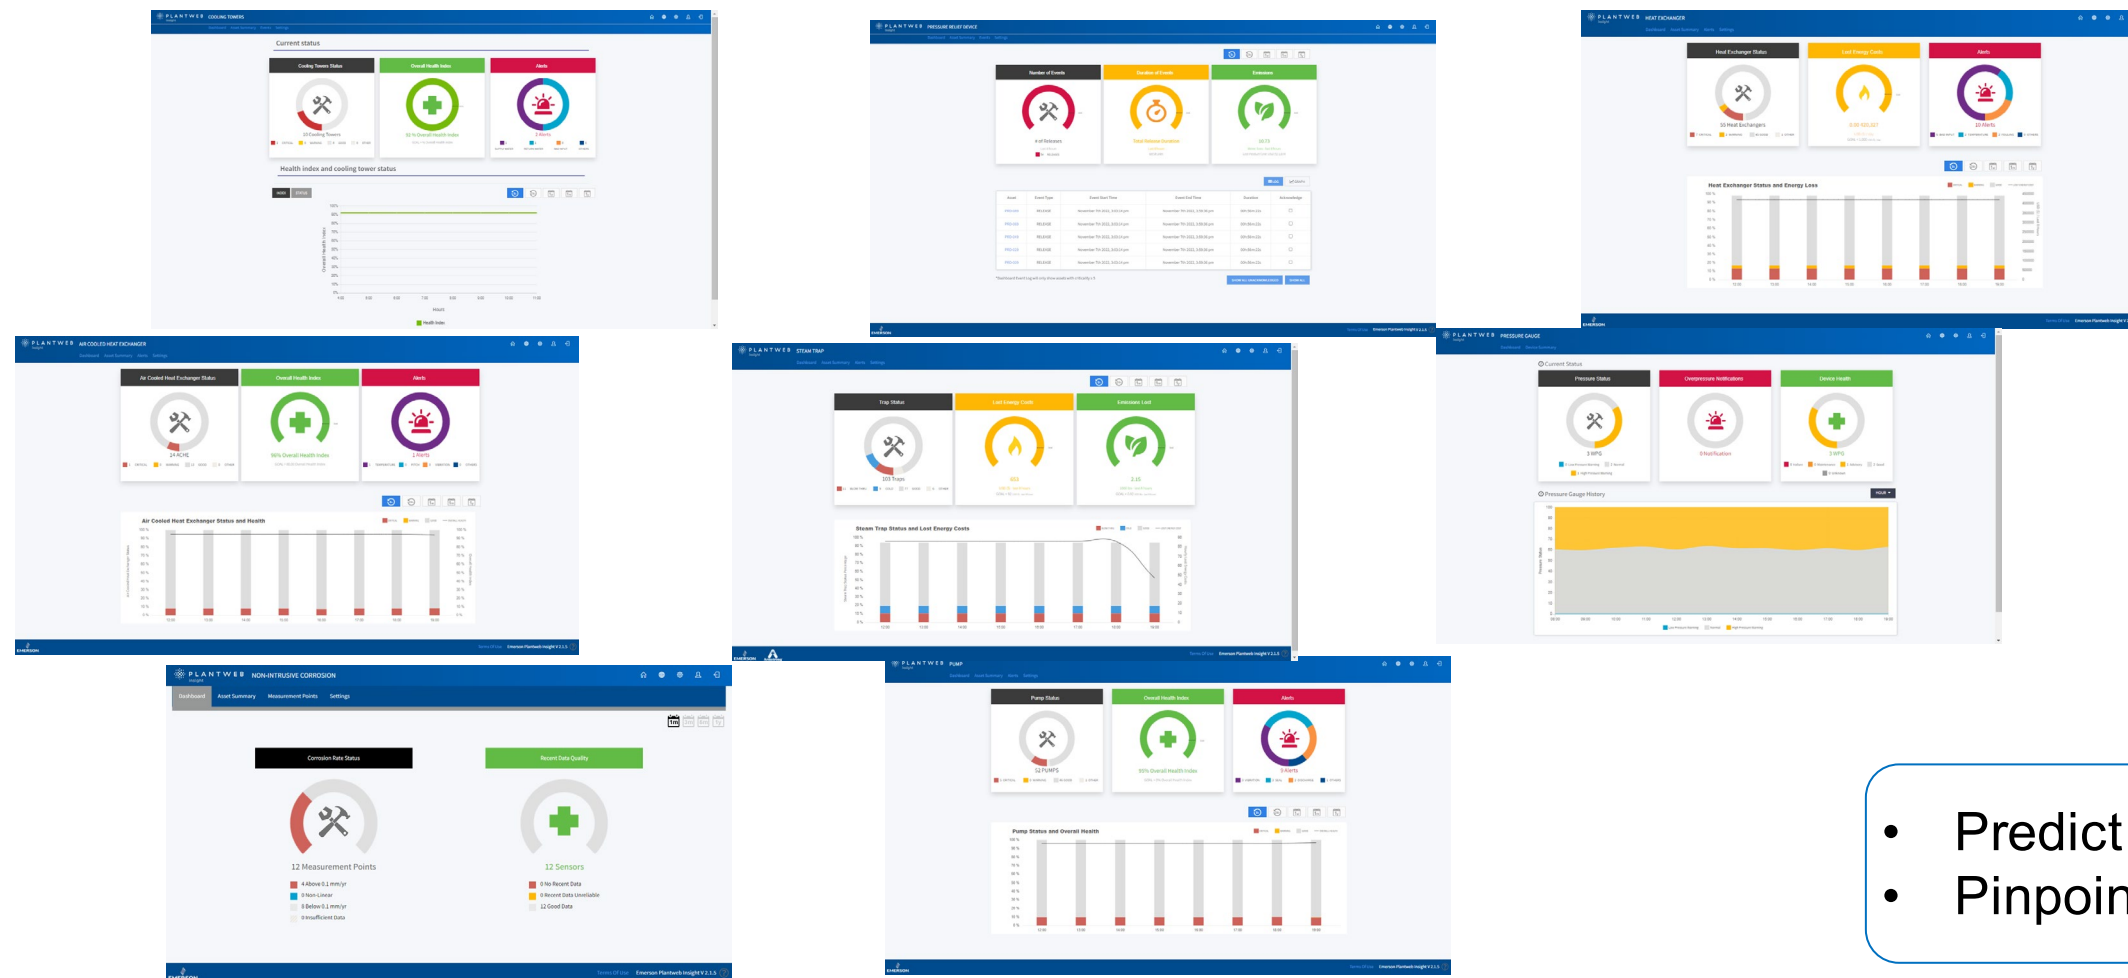

- Existing maintenance and reliability engineers can use it
 - No data science: no historical data import, data cleansing, no algorithm selection, no algorithm training runs and testing iterations, no unfamiliar terminology
 - Minimal upkeep
 - This is vital as talent is hard to come by

- Predict failures
- Pinpoint inefficiencies

Specialized Apps – Easy

- Specialized for process plant use-cases
- Domain-specific features
 - Relevant dashboards, detail visualization capabilities, and terminology

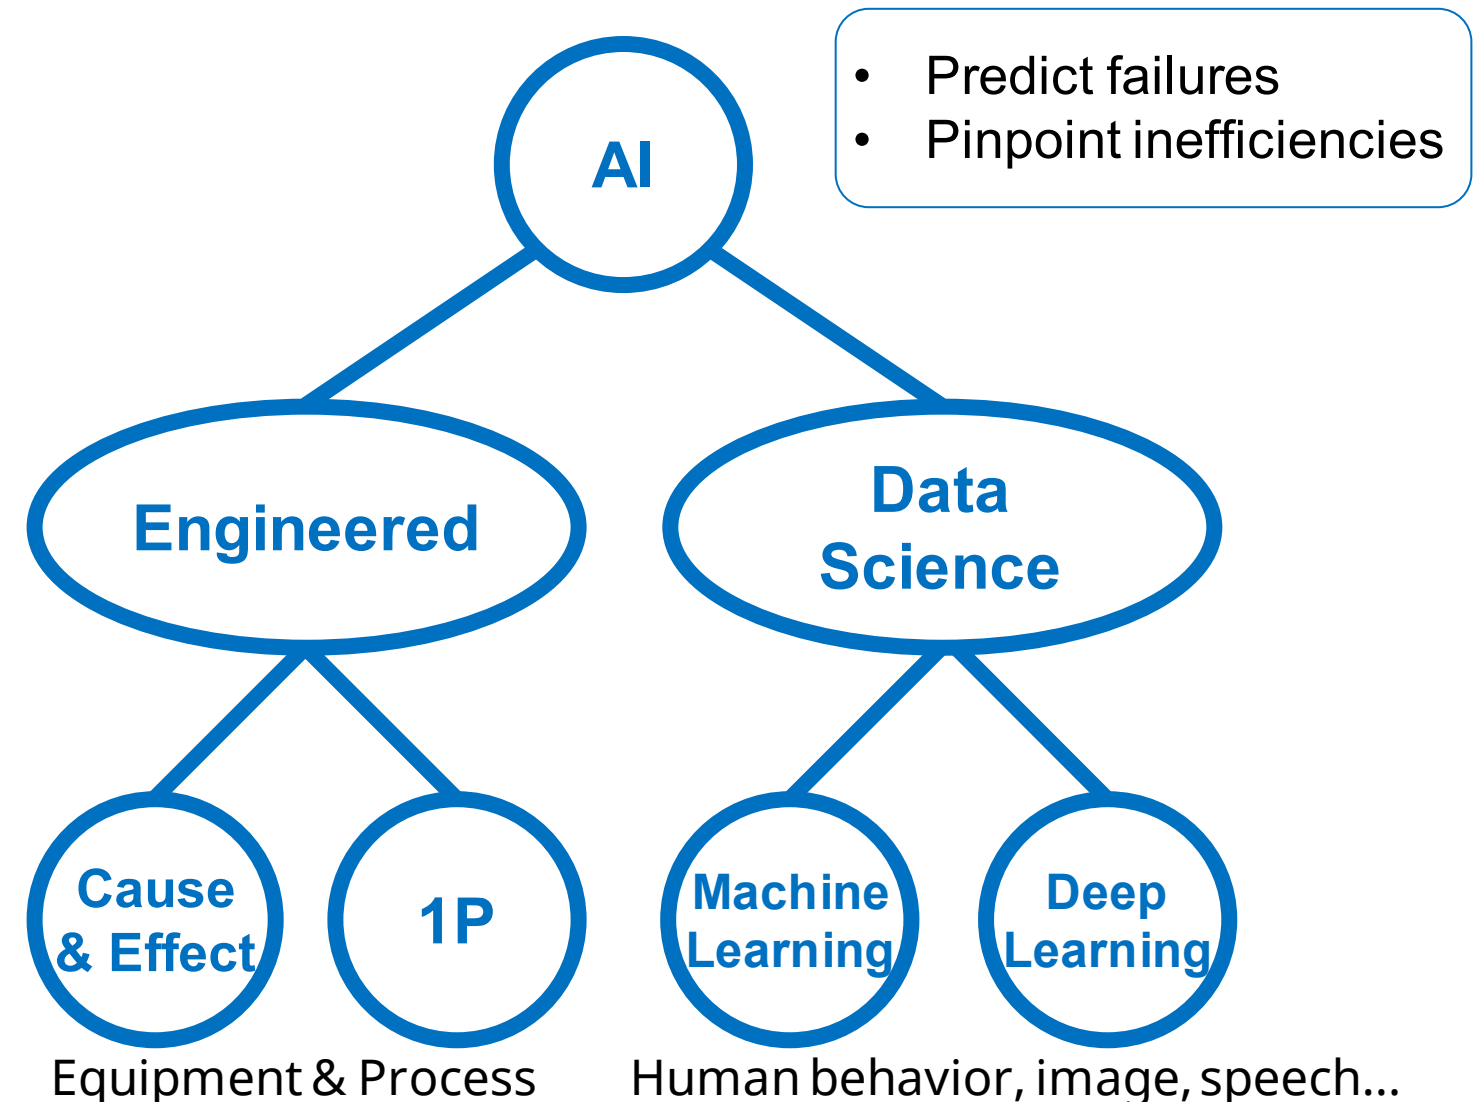

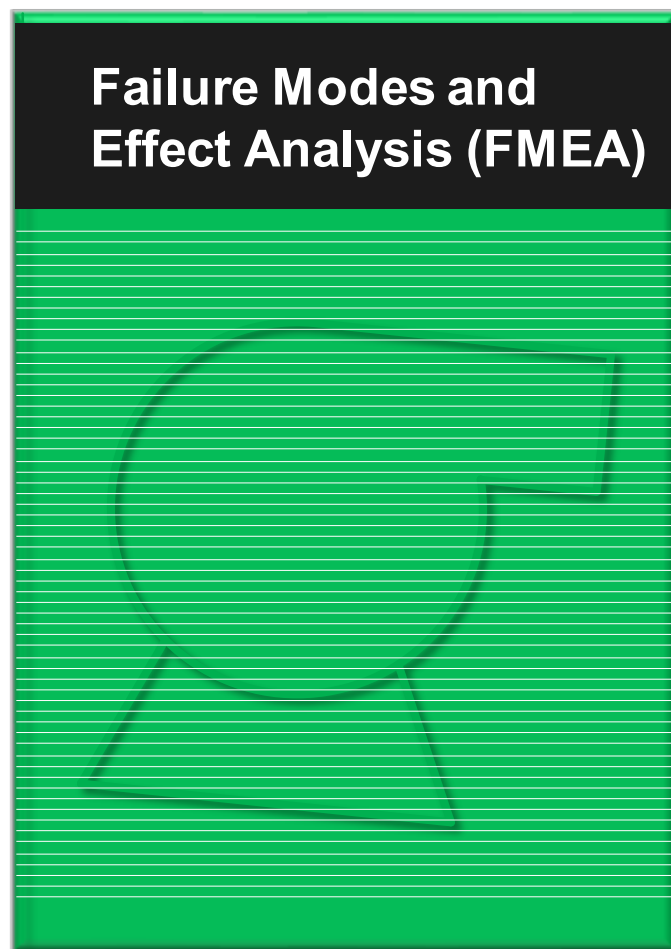

Operational Domains (Teams)

- ✓ Maintenance
- ✓ Reliability/Inspection
- ✓ Integrity/Corrosion
- ✓ Sustainability/Energy
- ✓ Process
- ✓ Health, Safety, and Environment
- ✓ Production
- ✓ Quality
- ...

- Predict failures
- Pinpoint inefficiencies

Engineered Analytics – Early and Reliable Predictions

- Mechanistic AI for equipment and processes with well-known cause & effect and first principles (1P)
- Deterministic: robust, verifiable

Pervasive Sensing “IIoT Sensors” / “M+O Sensors” – Early and Reliable Predictions

- All prediction are based on early symptoms
- All diagnosis (distinguish problems) is based on symptoms
- Automate data collection
- Sense every part of the plant
- Keeps personnel out of harm's way

- ✓ Corrosion
- ✓ Erosion
- ✓ Vibration
- ✓ Position
- ✓ Level
- ✓ Discrete
- ✓ Flow
- ✓ Pressure
- ✓ Temperature
- ✓ Acoustic noise
- ✓ Gas concentration
- ✓ Differential pressure
- ✓ Multi-temperature
- ✓ Motion
- ✓ Illuminance

Advanced Sensors – Low Total Installed Cost

- Wireless
 - No power cord, no signal wires
- Non-intrusive
 - No cutting, drilling, or welding
- Edge analytics
 - Peak acceleration
- ‘Cheap sensors’ do not provide comparable results

Bolt-on	Clamp-on	Slip-in	Reuse Connection
<ul style="list-style-type: none">• Position• Discrete• Gas concentration• Vibration	<ul style="list-style-type: none">• Corrosion• Erosion• Temperature• Acoustic	<ul style="list-style-type: none">• DP flow	<ul style="list-style-type: none">• Level• Pressure• Corrosivity

Industrial Wireless Sensor Network – Rapid, Capable, and Low Cost

- IEC62591 (WirelessHART)
- Data conversion to OPC-UA, HART-IP, Modbus, EtherNet/IP without coding or scripting
 - Easy integration of data to all kinds of third-party software
- No data left behind
- Centralized sensor management
 - Centralized configuration of remote sensors
 - Single app for diagnostics of all sensors

Think Big, Start Small, Scale Fast – Rapid and Low Cost

- Start with a workshop
- Select technologies, architecture, and components that solve multiple problems across the entire plant
- Deploy use-case solutions one at a time
- Quickly spread across all plants

Safety, Health, and Environment

Sustainability and Energy

Reliability, Maintenance, and Integrity

Production and Quality

Operational Results of Work Transformation

Safer	Greener	Longer	Faster
<ul style="list-style-type: none">• Fewer injuries• Fewer incidents• Reduced clean-up cost• Reduced fines	<ul style="list-style-type: none">• Reduced energy consumption and loss• Reduced energy cost• Reduced emissions	<ul style="list-style-type: none">• Reduced downtime• Reduced loss of containment• Lower maintenance cost	<ul style="list-style-type: none">• Reduced off-spec product• Greater throughput• Improved yield• Fewer site visits

The Power0

The Most Realistic Smart Plant Experience - The Emerson Solutions Center in Singapore

Smart plant visioning, Mobile notifications, KPI dashboards on mobile devices

Industrial Internet of Things (IIoT), integrated operations (iOps), fleet management, remote collaboration, expert support, cloud, equipment performance analytics, integrity management, energy management, predictive equipment condition analytics, big data management, web visualization, multivariate analysis (MVA), machine learning, process modelling & simulation

Digital twin, batch analytics

<https://www.youtube.com/watch?v=Boy0fuNEgZQ>

Interactive Plant Environment: wireless sensors, mobile workforce, RFID, wireless infrastructure, non-intrusive sensors, edge analytics

Digital twin, Virtual Reality (VR) upskilling

Workshops, discovery sessions, ideation, design thinking
